MEMBER 1: HUZAIFA ABID (SP19-BCS-025)

1. Conceptual Database Modeling

SIGNUP AS

- **USER**

-userName Primary Key (Contains Alphabets, Numbers,(.) and (_))

-password (Must contain atleast 8 alphanumeric characters)

-fullName (Only alphabets)

-fatherName (Only alphabets)

-phNumber Unique Key (Only Numbers and (+))

-email Unique Key (Alphanumeric characters)

-dateOfBirth (Numbers and (-))

-gender (Male, Female and others)

-address (Alpha Numeric)

-city (Alphabets)

-country (Alphabets)

- **AIRLINE COMPANY**

-userName Primary Key (Contains Alphabets, Numbers,(.) and (_))

-password (Must contain atleast 8 alphanumeric characters)

-companyName (Only alphabets)

-phone Unique Key (Only Numbers and (+))

-email Unique Key (Alphanumeric characters)

-address (Alpha Numeric)

ABDULLAH JAVED ASSIGNMENT(SP19-BCS-002)

FEEDBACK:

Missions and objectives:

Forms are used in at least three places in the application to fetch the data from the user. the code snippet of feedback form that's embedded in" Contact Us" page. The feedback form is declared and the fields are defined.

A small form called Feedback Form can be found in the "Contact Us" page. The users can send in their feedbacks to the company using this form. The form contains five fields where the users can enter their name, email address, service quality, rate out of five stars and message. The data from Feedback Form after sending is saved into company's database. Below shows the view of Feedback Form.

Contact us

Feedback form

Your name

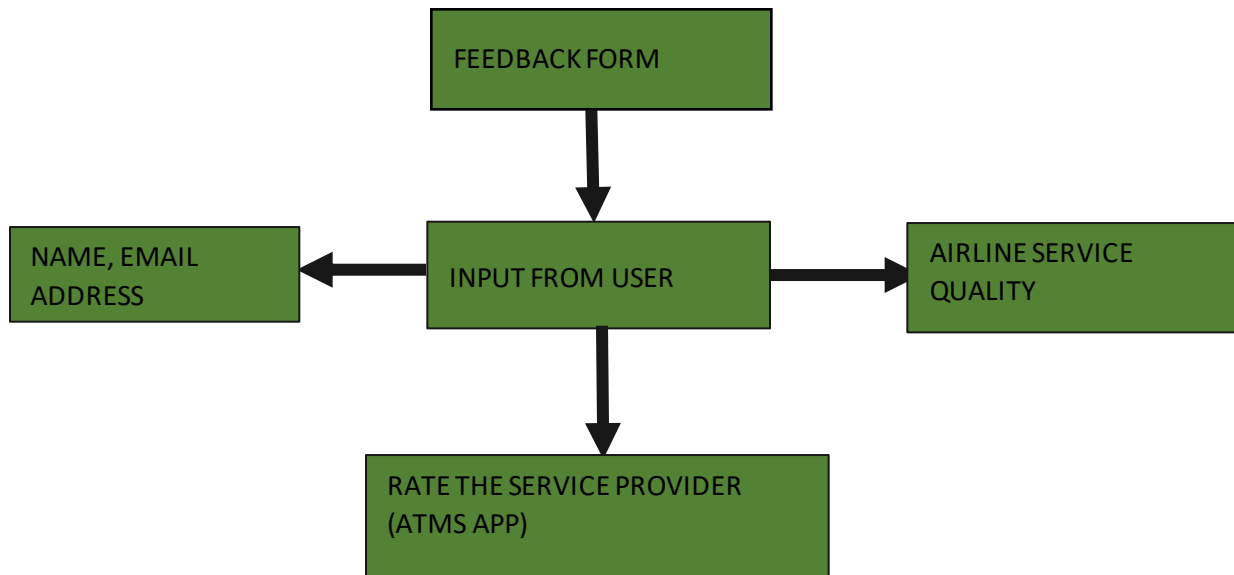

Email address

Services quality (tick one of the following)

Excellent, V. Good, Good, Satisfactory

Rate out of five stars

Your Message

Zulkifil rehman Assignment 2

Reg SP19-BCS-027

Mission and objectives and UI prototype of module

Main page

Mission hope page

Time duration 3 months

Problem in task

First we will learn java then oop then swing framework of java afterwards we will apply the given knowledge.

Primary mission

Main mission of homepage is to book ticket and get additional info such as

- Departing time and date
- Arriving time and date

Secondary mission

1. User can surf and see best deals on airline tickets that are available.
2. View top airlines
3. Email form
4. Client reviews
5. Methods of payment.

Objectives

1. We will design a UI search bar that displays airplane ticket details .store the details in mysql and design it in html css,php .
2. Add logo
3. Add menu
4. Add email form and store data in mysql library .

Prototype

Flight (home page)

1 st section

It would contain a simple flight search option . Which can contain flight from ,flight to ,departure ,returning .Here I have attached an example .

Search And Book Cheap Flights

Traveling in a group? [Apply here](#)

ONE WAY ROUND TRIP MULTI CITY

Flying from × Flying to ×

Departing 30 Nov, Mon Returning 30 Nov, Mon

Travelers 1 Adult, Economy

Search

2 nd section

It would contain airline reviews.

Airline reviews

[See all](#)

American Airlines

Delta Air Lines

United Airlines

JetBlue

3 rd section (about us section)

3 rd section would be about us section in the footer . It will contain adress ,maps location of our office ,phone number ,email .

Assignment 3

Module : Main surf

Flight	
Arrival_time	Varchar(255)
Departure_time	Varchar(255)
price	Varchar(255)
Flight_number	Varchar(255)
Destination	Varchar(255)
Departure	Varchar(255)
Arrival	Varchar(255)

Table

Flight search bar ER- diagram
